

Care Instructions

To keep your BARIL faucet looking its best, please follow these simple care instructions:

Do:

1. Rinse the faucet with clear water.
2. Dry the faucet with a soft cotton cloth.

Regular and routine cleaning will allow you to maintain your faucet in good condition. Wipe dry after each use with a soft dry cotton cloth to prevent water-spotting and mineral build-up.

If heavy cleaning is required, the following procedures are recommended:

1. Remove surface dirt and film using clear water and a soft cotton cloth.
2. To remove tough surface film and build-up dirt, use a non-acidic, non-abrasive gentle liquid soap without detergent.
3. Once clean, rinse faucet with clear water to thoroughly remove cleaner and blot dry with a soft cotton cloth.

While all BARIL finishes are designed for maximum durability, failure to give your faucet the proper care may void the warranty. As a result, here are a few helpful tips:

Do not:

1. Use abrasive cloths, cleaning pads or paper towels.
2. Use any abrasive cleansers (like Vim®, etc.).
3. Use any cleaning agents containing acids, polish, waxes, alcohol, ammonia, bleach, solvents or any other corrosive or harsh chemical cleansers.
4. Allow water to come into prolonged contact with faucet surface or to accumulate at base of faucet: preferably wipe down after each use.

Special finishes:

24K gold is a precious and soft finish, which must be treated gently, like you would treat fine jewelry.

The other special finishes like nickel, copper, bronze, matte black, etc. are unique handcrafted finishes, created so no two finishes look exactly alike. They are living finishes, and you will be able to admire their unique look and nice aging over time.

Follow all the recommendations listed above and make sure to wipe dry after each use with a soft dry cotton cloth.

Thanks to proper care, you will enjoy the glance of BARIL faucets for years.
