Classic Collections

Enhance your farmhouse bathroom with NAUTICA, RALPH, EVA and TRADITION! These collections combine our modern functions with traditional styles, blending perfectly into a cozy farmhouse decor. Their design evokes the craftsmanship of yesteryear, with curved shapes right down to the details on the handles. Go for a brushed finish like satin brass (LL) or satin copper (VV) for a completely rustic result, or pair them with a more contemporary finish like chrome (CC), gold (GG) or even white (BB) for a modern touch.

AIR B80

AIR offers a variety of shapes and plenty of finishes to choose from to create your very own faucets. Inspired by the principle of simplicity, this collection features basic geometric shapes, sleek lines and slim edges, giving it an airy effect that blends into any bathroom style. Have fun trying out different combinations to find the one that's right for you!

Future-proof

Conceived and designed as a platform, AIR offers not only future-proof styles, but also universal components that can be reused rather than replaced. In a sustainability effort, the BARIL design team offers with AIR the possibility to make your faucets evolve with trends. For example, change the shape of the handles, the spout, or even the finishes, without touching the underlying plumbing hardware. In other words, give your faucets a second life!

Just like MARIE and FLORA, the potential for these platforms in the future is infinite, this is just the first step in the right direction.
