# BARIL

STYLE X FUNCTION

The MARIE collection is the meeting of two women, two entrepreneurs and two great Quebec brands, a luxury house and a high-end faucet maker. On the occasion of the 35th anniversary of Maison Marie Saint Pierre and BARIL, the two women have combined their respective talents in a collaboration whose motivation is to bring beauty, functionality and well-being to everyday life. Sharing a passion for quality and unique design, the MARIE collection pushes the boundaries of creativity in faucets and water accessories.

STYLE X FUNCTION

## Complete Thermostatic Shower/Bath Valve with 2-way Diverter

### Easy Trim Installation

The “clip plate” system makes it easier to install the trim and provides a wide range of depth adjustment.

### Easy Rough-in Installation

The flat back housing and three anchors molded onto the valve rough-in ensure easy and stable installation.

### European Cartridges

High performance and perfectly calibrated ceramic cartridges with outstanding durability.

### High Quality Materials

Made of solid brass, thicker than average, BARIL valves are stronger and more durable.

### Unique Design

With its pure forms inspired by nature, the Marie collection does not go unnoticed.

### Temperature Limiting

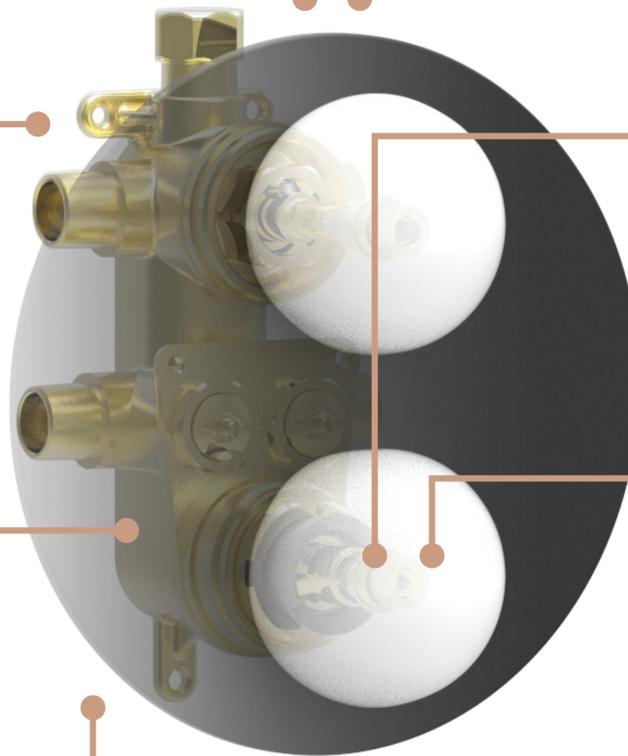

The anti-scald ring on the cartridge is preset at 49°C/120°F.

### Temperature Stabilization

The cartridge has a temperature variation of less than 1°C, making it one of the valves with the least temperature variation on the market.

### Customizable Finishes

Each component is offered in a selection of finishes, all manufactured with state-of-the-art equipment.

Mist (I)

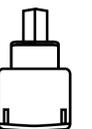

Matte Black (K)

French Gold (J)

BARIL equals quality

High flow rate

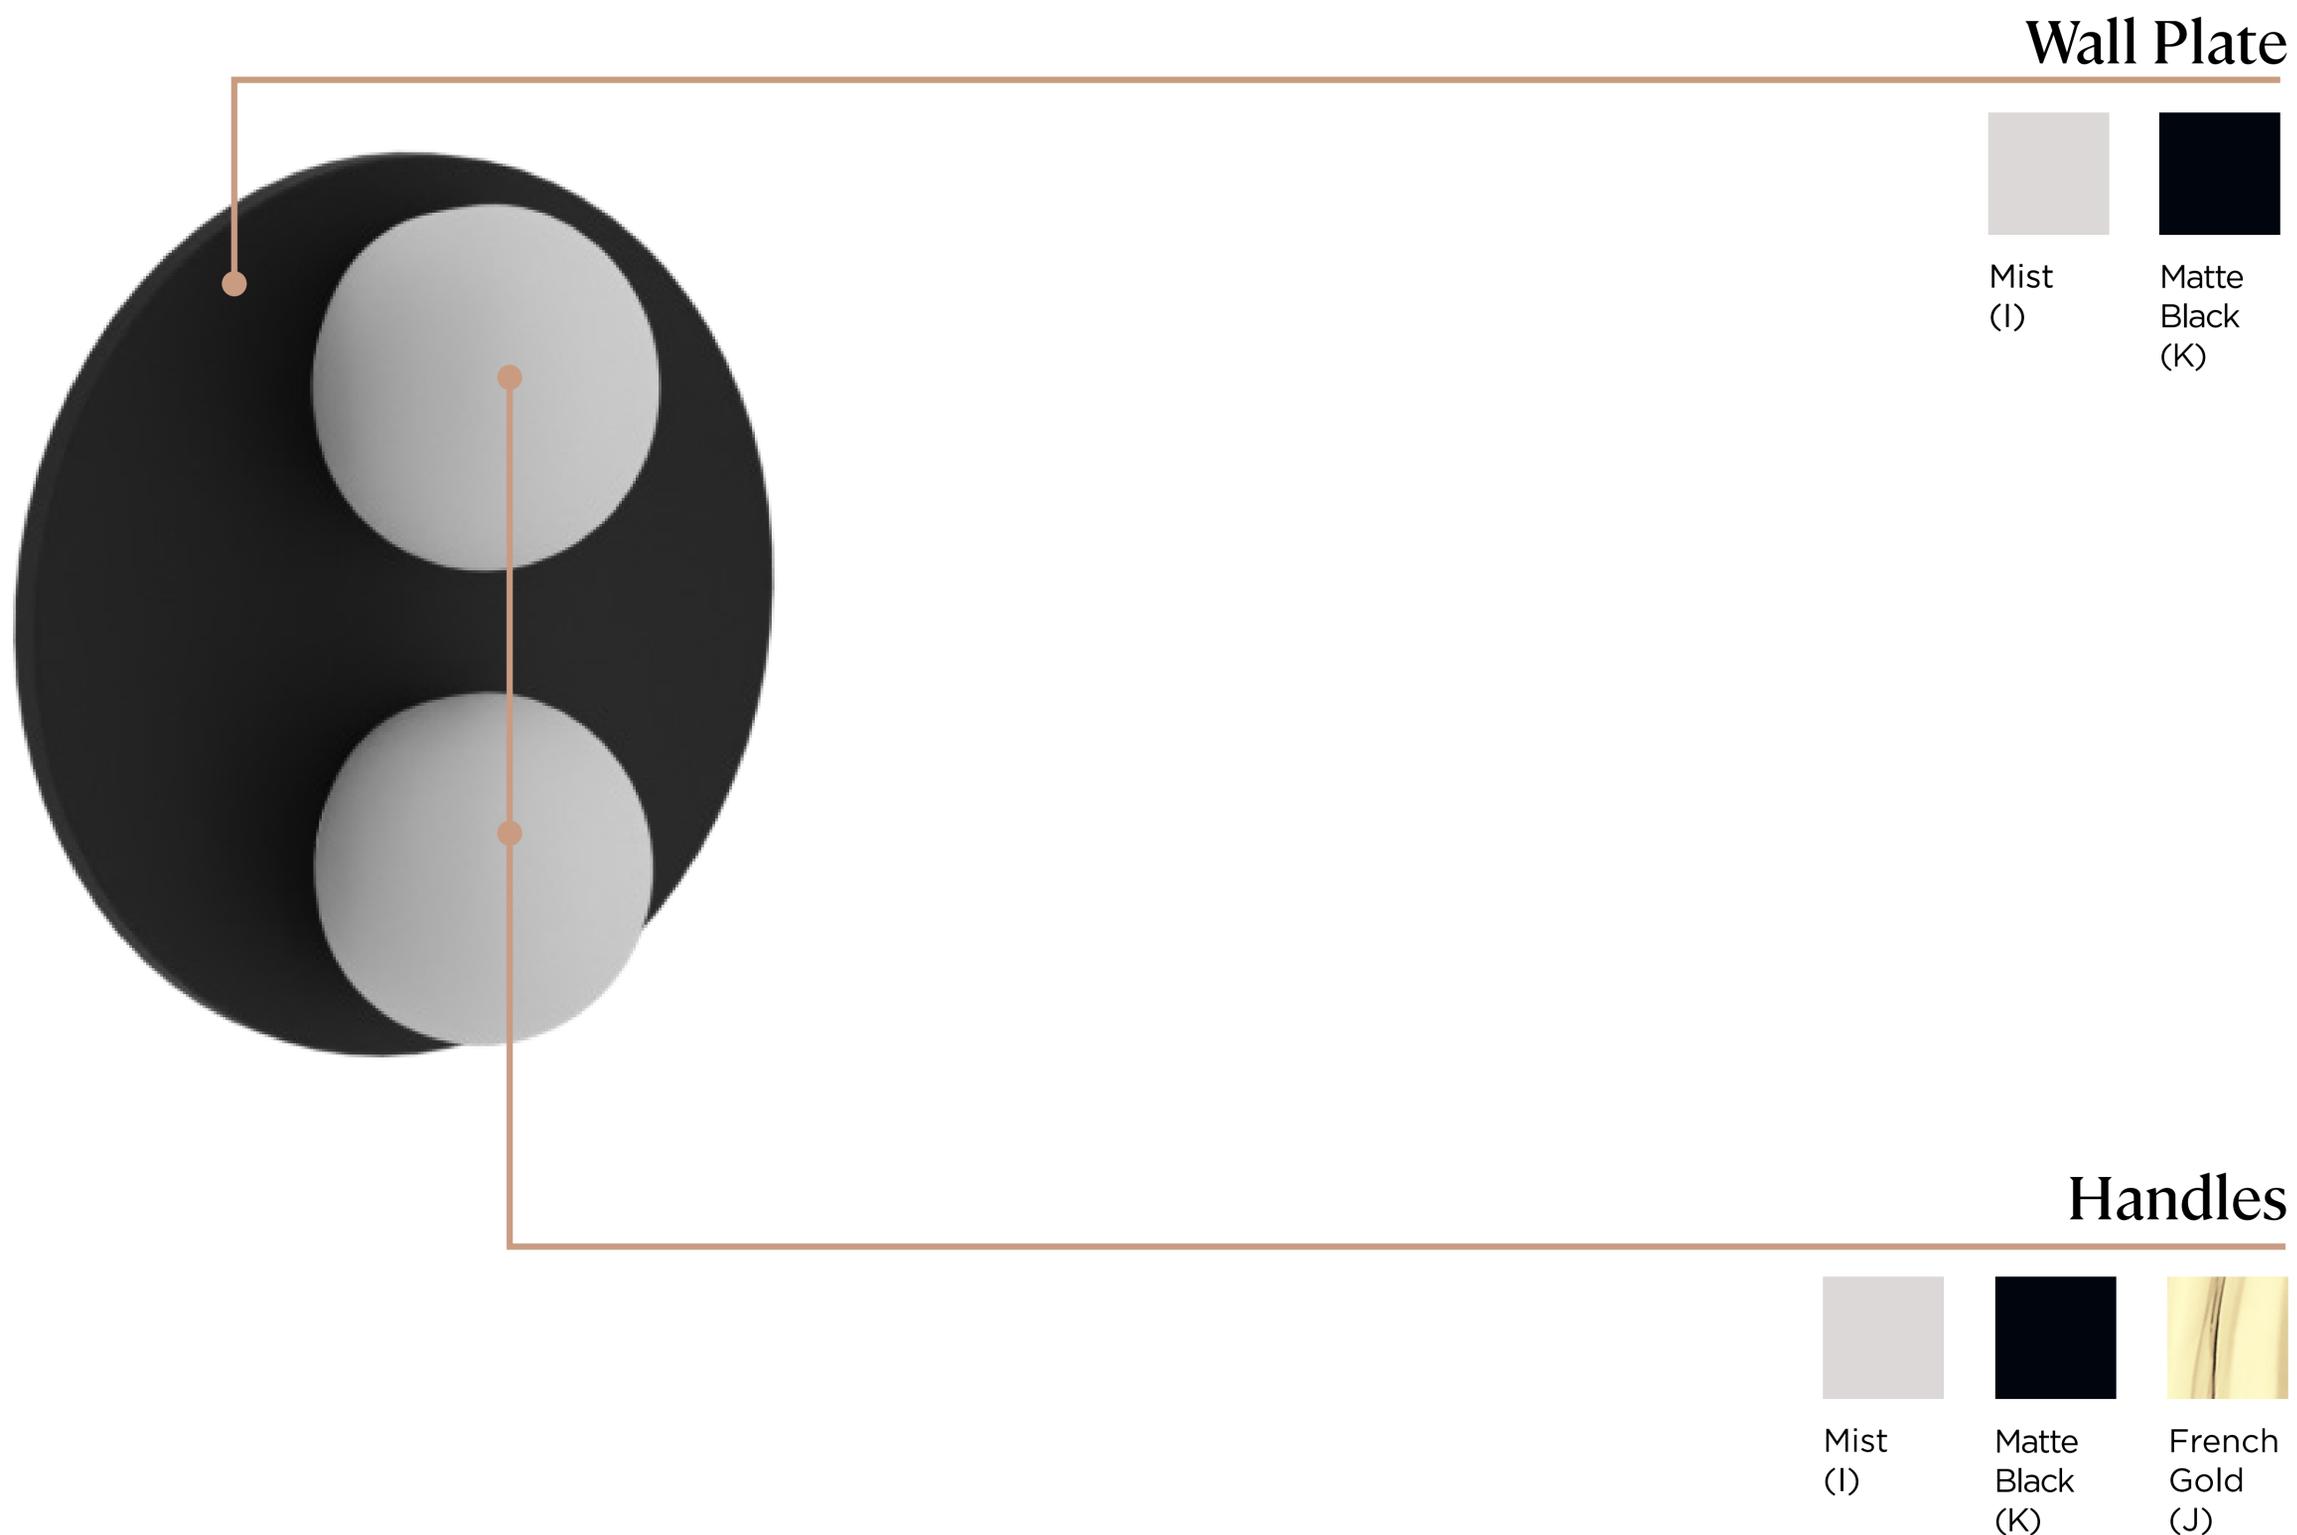

Durable ceramic cartridge

# MARIE Finishes

For its MARIE collection, BARIL offers a palette of customizable finishes for each component. Choose independently the desired finishes for the plate and the handles to create your own assortment. Have some fun and try different combinations, the possibilities are endless!

# BARIL

STYLE X FUNCTION

# Valve Controls

BARIL valves offer intuitive and ergonomic controls. Connected to high quality cartridges, they combine ease of use, temperature stability and safety for you and your family.

# BARIL

STYLE X FUNCTION

## Top Handle

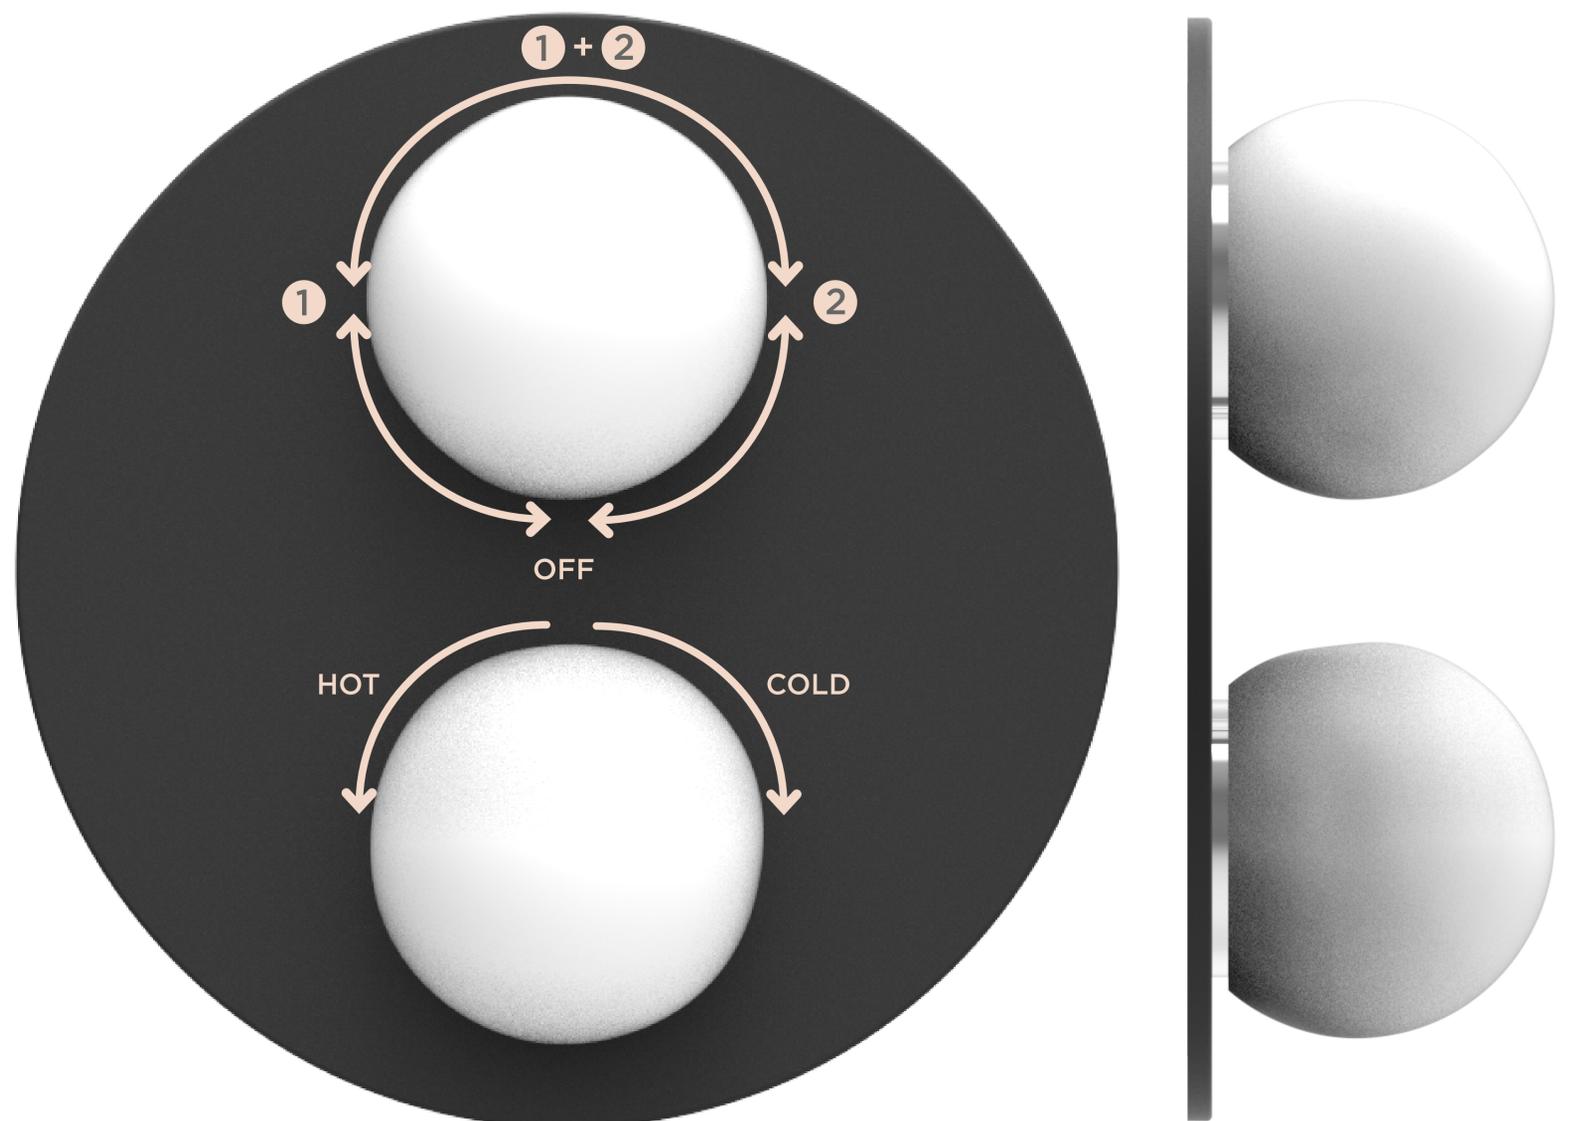

Open the water with the flow control, turn in one direction or another depending on the desired accessory. If you continue towards the shared position, both accessories will be used simultaneously. Thanks to the high overall flow rate of the valve, you will still enjoy maximum and stable flow for both accessories.

## Safety feature

For your safety, the anti-scald temperature limiting ring on the cartridge is preset to 49°C/120°F but can be lowered manually to suit your preference.

## Bottom Handle

Adjust the temperature as you wish. It will remain the same until the next time you use your bath or shower.

## Thin Brass Plate

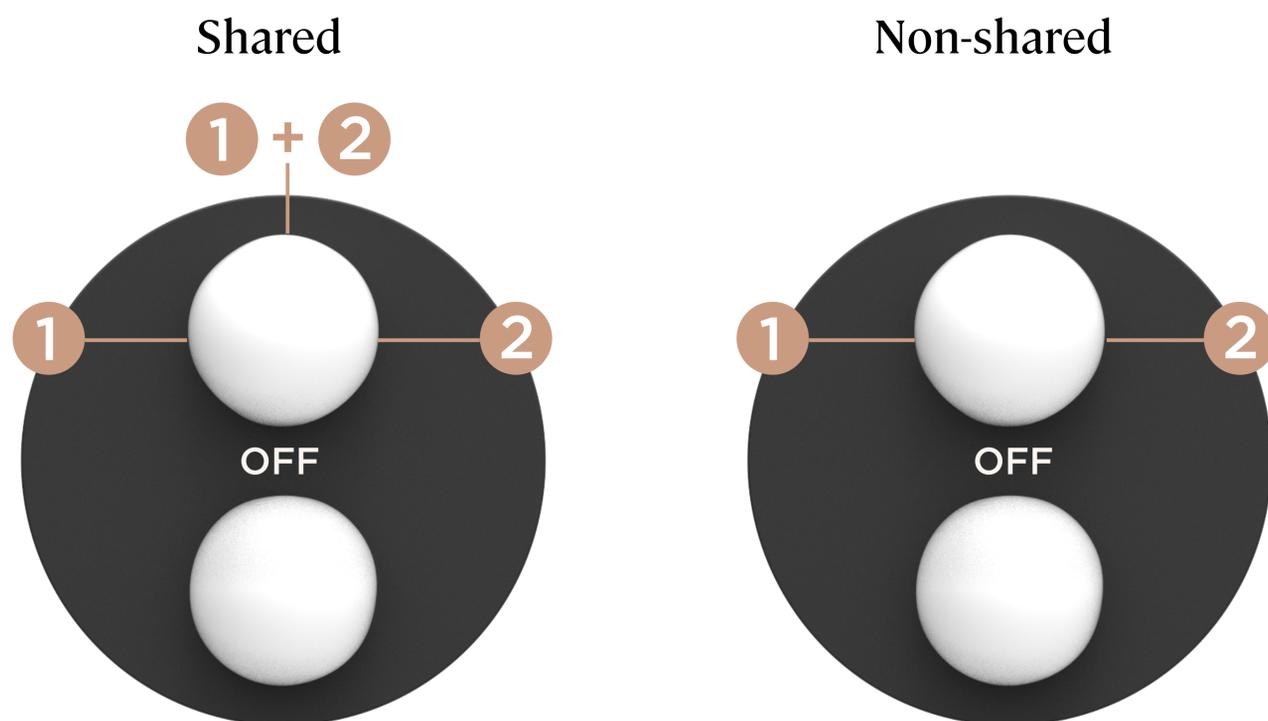

Delicate and elegant look.

# Rough-in Options

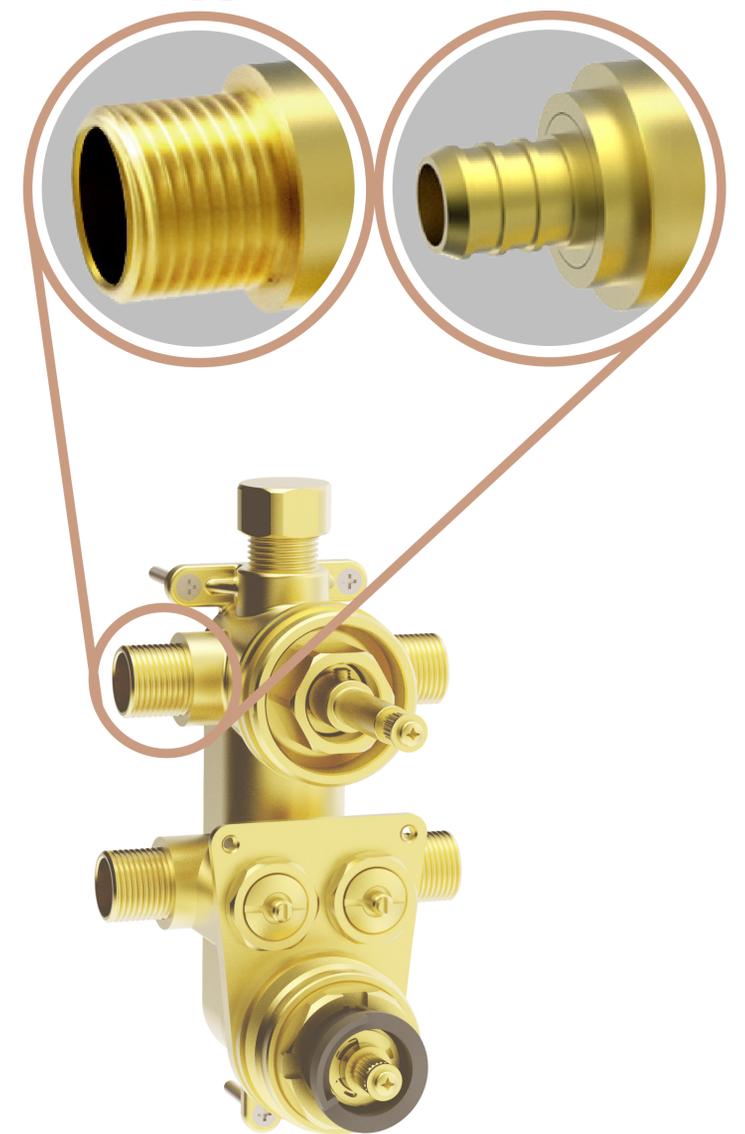

Whether it's because you want to choose the type of connection you prefer, for ease of installation, to comply with your local regulations, or simply to reduce your water consumption, choose the option that best suits you.

# BARIL

STYLE X FUNCTION

Welded copper (00)      PEX (P0)

## Eco-friendly Options

CALGreen  
compliant

The standard rough-in comes with the shared position option, which means it allows the use of two accessories simultaneously. If you want to reduce your water consumption, you can always opt for the non-shared rough-in.

Simply order:

- B35-9521-00-xx-**NS** ou
- T35-9521-00-xx + RVA-9521-x0-**NS**-B

## Fitting Options

For welded copper fittings, order:

- B35-9521-**00**-xx ou
- T35-9521-00-xx + RVA-9521-**00**-B

For PEX fittings, order:

- T35-9521-00-xx + RVA-9521-**P0**-B

# Temperature Stabilization

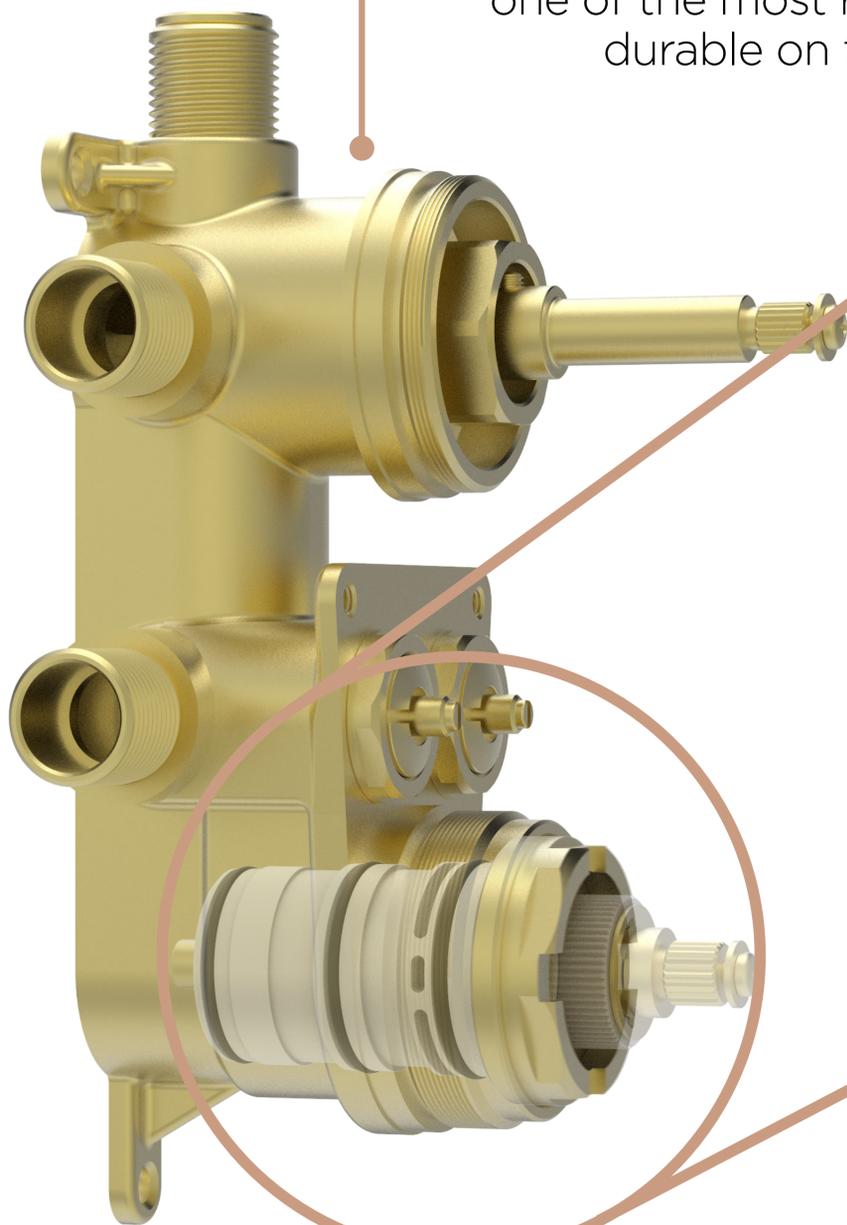

The cartridge allows to preset the temperature so that it reacts to the slightest variations. Therefore, the temperature at the water outlet will remain unchanged, regardless of the temperature and pressure of hot and cold water supplies.

# BARIL

STYLE X FUNCTION

## European Diverter Cartridge

Made of high performance ceramic, this cartridge is one of the most reliable and durable on the market.

## High Quality Materials

Perfectly calibrated, the thermostatic component of this cartridge ensures constant water flow and extremely precise water temperature control. The high-precision machining of its parts allows for a high flow rate, while its plastic casing prevents scale build-up.

# Attention to Detail

Just like all of our BARIL faucets, the MARIE collection was designed with both style and function in mind. In fact, MARIE offers a balance between multi-purpose, versatile and efficient use, and a sculptural, customizable look.

## Product Codes

Rough and trim	B35-9521-00-xx
Trim only	T35-9521-00-xx
Rough valve (copper)	RVA-9521-00-B
Rough valve (PEX)	RVA-9521-P0-B

## Dimensions

Diameter: 7-3/4"

Depth: 2-3/4"

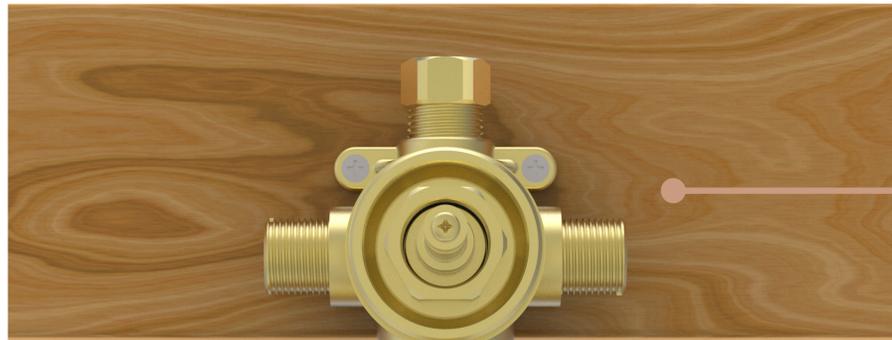

# Easy Rough-in Installation

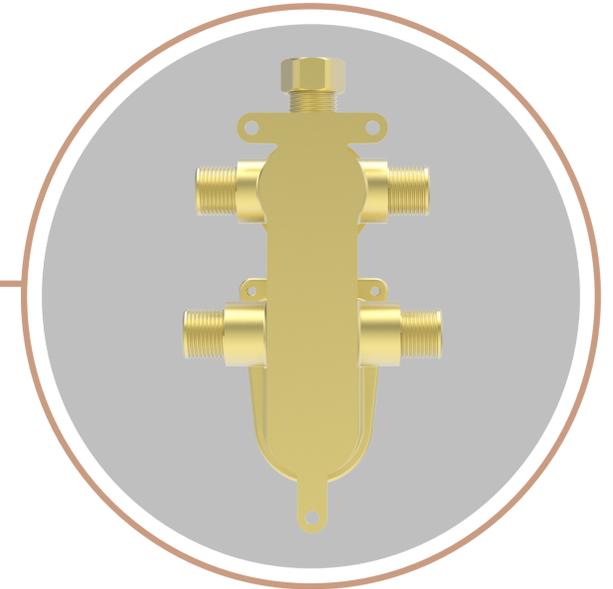

# BARIL

STYLE X FUNCTION

With the flat back and anchors molded directly onto the valve rough-in, installation is easy and very stable.

**Flat Back**

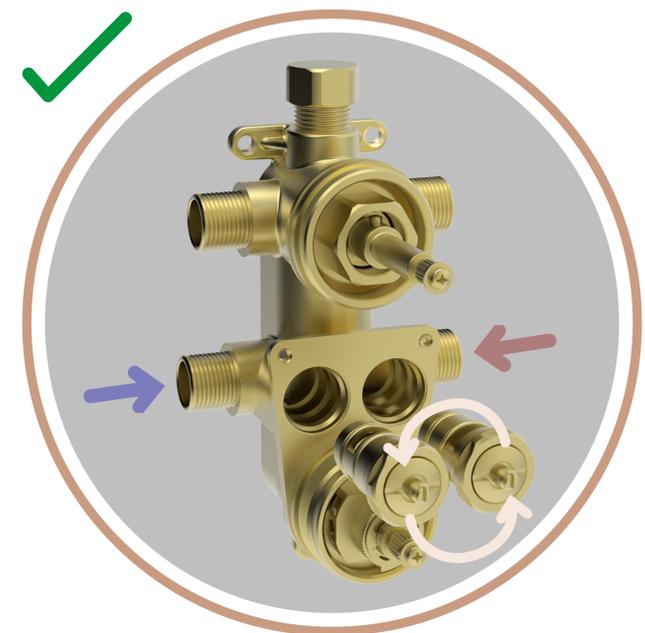

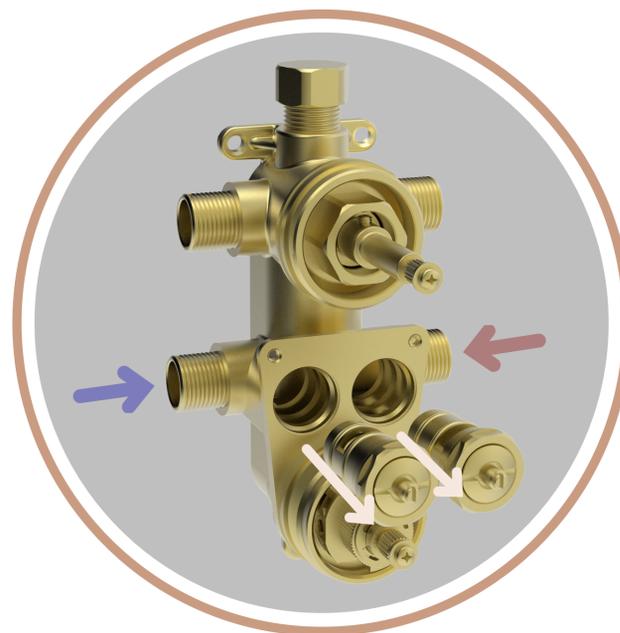

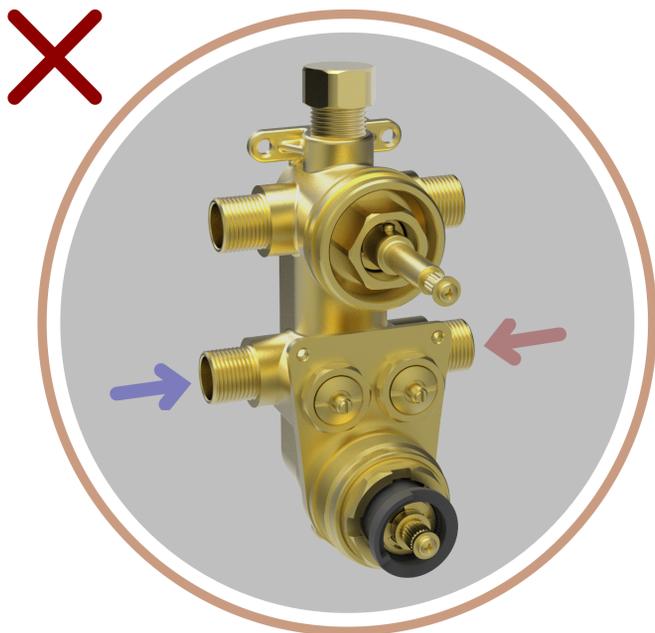

**Temperature Limiting**

This TP type valve includes an anti-scald temperature limiter ring made of resistant ABS plastic. It is mounted on the thermostatic cartridge and preset at 49°C/120°F for your safety. You can always adjust it if necessary.

## Reversible Check Stops

In case of hot and cold water supply reversal, the valve will not supply lukewarm water, only hot or cold water. To remedy this situation, simply switch the position of the check valves.

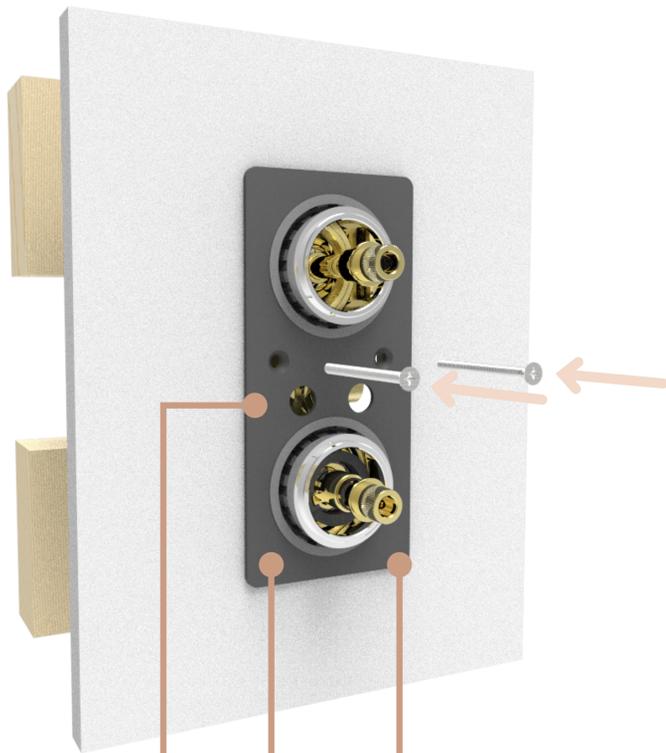

# Easy Trim Installation

# BARIL

STYLE X FUNCTION

BARIL trims are solid and easy to install. The one-inch depth adjustment, the drilling template and the “clip plate” system all make the job easier when the time comes so the installation is done quickly and flawlessly.

## “Clip Plate”

This system ensures that the trim stays firmly in place by sandwiching the wall.

## Watertight

A foam on the back of the plate ensures an optimal watertightness.

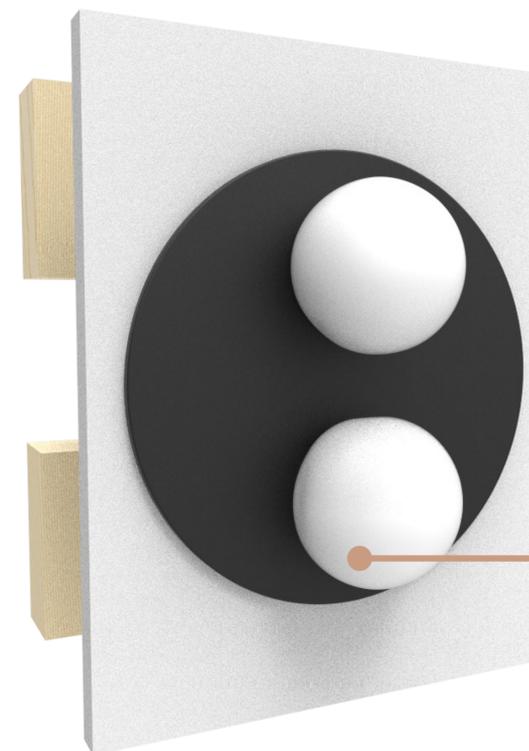

## Front Access

The check stops are easily accessible, allowing the water supply to be shut off for cartridge maintenance without shutting off the main water supply.

## Brass Trim Plate

Simply clip it onto the plastic plate using the “clip plate” system.

## Elegant Look

No visible screws for a sleek look.
